

## NHV Group – B2 Engineer

**The helicopter B2 Engineer is responsible for the maintenance of the helicopters. They will work in a team of engineers and reports to the Maintenance Lead.**

### About NHV

NHV Group is an international helicopter service provider, specialised in business-to-business helicopter services both offshore & onshore.

We aim to create a leading position in the helicopter world with a primary focus on Europe and Africa, without compromising our safety. We strive to provide an increasing level of flexibility to our customers. Our services and experience present a refreshing and safe alternative in the industry. NHV cares about its people and invests in them to shape the best professionals in the industry.

At NHV, we are dedicated to delivering excellence in the helicopter world. With a commitment to safety, innovation, and customer centricity, we provide reliable services that support a wide range of missions.

### Responsibilities

- Comply with the requirements as described in the regulations;
- Ensure that all line maintenance tasks carried out to helicopters meet the standard of the UK CAA and M.O.E. instructions;
- Ensure, together with all Engineers, a variable and flexible work planning and work roster based on business needs that supports and realizes business continuity;
- Ensure that all maintenance is completed within the appropriate time scales to ensure provision of a serviceable aircraft to meet the operational need;
- Ensure, based on pilot and all other relevant information, daily problem analysis and problem solving;
- Ensure briefing and debriefing of pilots and Maintenance Lead;
- Ensure that PRF (preflight check) is performed;
- Ensure, in cooperation with NHV Supply Chain, Store and support services that the necessary maintenance material and spare parts are present on site at the planned moment: material in service car, consumables, limited service stock, work material, material needed for normal day-to-day line maintenance, exceptional material supplied for exceptional line maintenance or small repair tasks;
- Report daily on the maintenance situation to the Maintenance Lead.

## Skills & Experience

### Experience

- UK CAA Part 66 B2 License
- Minimum 5 years of relevant experience in aviation and as a licensed engineer is preferred
- Engineering experience in different aviation companies is a plus

## Skills

- ICT literate (specific aviation software & MS Office)
- Languages: English (professional level)
- Knows & operates by the procedure and processes (operational, quality, safety ...) installed by the company
- Good communicator:
  - debriefing to pilots, flight crew and Maintenance Lead
  - handover of work from/to previous/next shift
- Able to work independently when performing in a less controlled environment and to take initiative to improve work and complete tasks within appropriate time scales

## What we offer
